

About Us

Ship design, ship design poland, yacht design, basic design, detail design, workshop documentation

Galliot Marine Design is privately owned, independent Polish consulting and engineering company, founded in 1999 by Krzysztof KamiDski.

The company is located in GdaDsk, Poland and is active mainly in shipbuilding sector. The company is basing on experience engineers and is able to cover full scope of design activities. Recently we are working with NUPAS-CADMATIC software, we have capabilities to use AVEVA (Tribon), classification societies software as Poseidon, Nauticus, Mars, RuleCalc and of course we are able to use basic CAD software.

The main field of activities:

- Design of full range of trade vessels, mega yachts, offshore units including initial design, class design, stability and finite element calculation - for new design and rebuilding.
- Workshop documentation using Nupas-Cadmatic, Cad.
- Nesting and cutting files using NESTIX.
- Supervising

We are also able to provide service in:

- Design of steel workshop structure and production/trade sheds.
- Design of prestressed concrete structure.
- Design of fuel and oil tanks up to 100.000 m3 with solid and floating roofs.
- Plant design and support construction for pipelines.

On the end of scope of our abilities we offer to our client supervising and execution of our project, by our partners - proven yards and contractors. In our offer you can find steel, aluminium and stainless steel construction.

Please take some time and browse majeure references.

For more information please do not hesitate to contact us.
